PM156S: Aerospace Monolithic JFET Input Operational Amplifier

The PM156 provides low input current, high slew rate, and direct interchangeability with LF156 type. This operational amplifier uses a new process which allows fabrication of matched JFET transistors ... More

Features

- Low Input Bias and Offset Currents
- Low Input Offset Voltage: 1.0mV typical
- Low Input Offset Voltage Drift: 3.0µV/°C typical
- Low Input Noise Current
- High Common -Mode Rejection Ratio: 100dB
- Low Supply Current
