Kit Information

Description

The RF Industries Unidapt™ kit for DAS (RFA-4024-DAS) contains 2 each male and female 4.3-10, 4.1-9.5 (Mini) DIN, QMA, 7-16 DIN, N, SMA and reverse polarity SMA and TNC interfaces along with 6 universal adapters. The Unidapt™ components are housed in a convenient soft sided zippered case. The kit allows you to assemble up to 6 adapters using any combination of the included interfaces.

The 4.3-10, 4.1-9.5 (Mini) DIN and QMA interfaces exhibit low PIM performance of -155dBc @ 700Mhz & 1900Mhz IM3 only when used together.

The new interfaces are manufactured with durable, non-tarnish tri-metal (white bronze) plated machined brass bodies, silver plated contacts with PTFE dielectric.

In addition, the interfaces can be used with other members of the Unidapt™ family, including R/A adapter, T adapter, Unicables™, wattmeter flange adapters, RF Sampler/injector, binding post and banana plug. Various Unidapt™ kits are available and compatible with the new interfaces.
