DESCRIPTION

The Teledyne Relays 3PAK220 relay is a 3-phase, 250 Vac solid-state relay with status indication. It delivers 28 Vdc input and 1.1A output. Relay inputs and outputs are optically isolated.

The relay is a commercial-off-the-shelf (COTS) relay designed for 3-phase, 47–440 Hz applications where low EMI and reliable operation under conditions of severe environmental stress are a requirement.

Electromagnetic interference compliant per the requirements of MIL-STD-461 and MIL-STD-462. This relay component passes “in-system” EMI testing for conducted emissions per test methods CE01, CD02 and CE04; for conducted susceptibility per CS01, CS02 and CS06; and for radiated susceptibility per RS02 and RS03.
