Product Notification - Flex Shanghai JID site relocation**1 Products affected**

All Flex power modules products

2 PN Classification

There is no change to the products - the product number and revision remain the same.

3 Reason for Change

To support rapidly growing customer demand, Flex Power Modules Shanghai JID(Jiading) site will be relocated to a larger size building in a new Industrial Park zone which is around 7km away from the current location, but still within Shanghai Jiading district.

4 Impact of change

The relocation will start from March 1st, 2026, and full production capacity is expected by the end of May 2026 according to plan. There is no change in the workforce, materials, machines, or the manufacturing process during the relocation.

During the transition period, the current factory will keep working until the end of May 2026 to maintain as much output as it can to support customer demand.

5 Inventory Status

There is no impact on any inventory on the customer side.

6 Safety approvals

The UL certification to the new factory will start from March 2026 and is expected to be completed by late April 2026.
