Subject: End of Life Notification for SP12T Terminated and Non-Terminated 'circular' models.

Dear Customers,

Quick historic reminder first: RADIALL decided to launch several years ago a big project of re-designing our whole range of Terminated SPnT (SP6T-SP8T-SP10T and SP12T) to get rid of the use of mobile resistor rods which is considered as a major procurement risk by our operation team. RADIALL already released his news SP6T in Q2 2021 and SP8T in Q3 2023.

This was the starting point, then RADIALL took profit of this redesign to improve the RF performances of our switches using the new pusher patented (developed for our 50 and 67GHz switch offer) and new design of internal loads.

Moreover, these modifications will also allow an improvement of life duration.

That's the turn for our SP12T Terminated and Non-Terminated.

RADIALL have made the decision to stop manufacturing previous design SP12T coaxial switches (circular models) and replace them by his new design (square flange models).

Therefore, RADIALL is announcing that **R5734xx2xx, R573Fxx2xx, R5744xx2xx and R574Fxx2xx** part numbers (SP12T Non-Terminated & Terminated fitted with SMA up to 18GHz) will become obsolete at **November 2025**.

RADIALL now will offer you replacement range R5234xx2xx and R5244xx2xx which are available now.

About **SPECIFIC** SP12T coaxial switches, developed in the past for different customers, it will be studied together case by case.

Should you have any concerns regarding this obsolescence and if you have demands of the existing Radiall SP12T, **you can still order them to cover your needs until the end of summer 2026,**

e.g. August 31th, 2026.

However, we advise you to qualify and replace them with our R524 series.

About prices and deliveries? Both versions (square ones and circular ones) will have the same price and same deliveries as well.

With this letter we also want to inform you that SP10T of this range will also be replaced in the next year with no date determined yet.

Do not hesitate to contact your local sales representative or authorized distributors if you have any questions about this obsolescence.

Sincerely

Régis MOUETAUX
Product manager
