2 Reason for discontinuation

u-blox has decided to announce the end-of-life for the type numbers of the products listed above. The reason is the availability of pin-compatible successor products with enhanced performance and portfolio consolidation.

3 Customer impact and recommended action

u-blox recommends migrating from SARA-R5 "00B" version to SARA-R5 "01B" version, which is pin-compatible, covers all features and certifications of the "00B" version and comes with enhanced performance and additional features.

Putting the successor products into use requires the associated approvals and certifications. Please check with u-blox support team to find out what is needed to maintain approvals and certifications on the end device.

End-of-life products cannot be firmware upgraded to the successor products.
