Part Number: AC244055 - PIC16(L)F1939 Emulation Extension Pak

The PIC16(L)F1939-ME2 Emulation Extension Pak* delivers advanced in-circuit debugging features:

- Hardware Instruction Trace**
- 32 Runtime Data Watch points**
- 32 Powerful Hardware breakpoints/trigger events: address/data, ranges, data-masking/comparison, in/out of ISR
- Runtime register reads/writes and breakpoints
- 4 Event Combiners: each combines 8 combinational or sequential events into a single event trigger
- Stack Snapshot
- Trigger In/Out
- Event breakpoints
- Breakpoints and other events can trigger without halting execution
- Stopwatch Cycle Counter
- Previous PC query
- Breakpoints, trace, stack snapshots, triggers, and event combiners use a common set of events for complex triggering

Trace adapter/cable** and short gold SIP pins included.

* Emulates PIC16(L)F1933/4/6/7/8/9 devices.

**Requires MPLAB REAL ICE tool. [More Info >>](#)

Standard Pricing:

In Stock (Processes Immediately): **11**
