The Routing card requires a Socket card and an STK600 motherboard to support the selected device. Note that STK600 can NOT program the SAMD20. This routing card is only intended as a breakout board. See the user guide for connection options.

Please note that although care has been taken in the degree of relevancy, pictures are for display purposes only, and product appearance may differ from what you see. If there are any discrepancies between the product headline, description and picture, the correct information will be in the product headline (i.e. computer systems may not come with monitors even if pictured that way). If anything is unclear, please email support before placing your order.
