

To whom it may concern

## **ZOE-M8x End of Life**

Dear valued customers,

We regret to inform you that we have made the decision to discontinue the GNSS modules ZOE-M8Q, ZOE-M8B, and ZOE-M8G. This decision was made in response to the recent announcement by our core module supplier, TDK, that they will be discontinuing their production lines for this technology by the end of 2025. Due to the given aggressive production shutdown timeline, the production capacity and relatively long lead time, we have imposed a last time buy deadline of April 30th 2025.

Thalwil, 05-Feb-2025

C1-Public

We are currently observing a significant decrease in demand for ZOE products, primarily because most customers have transitioned to our newer successor modules, MIA-M10Q and MIA-M10C. Given the remaining low demand for ZOE, we have decided not to switch this product to a new supplier, as this would need a significant investment as well as a significant effort for re-characterization and re-qualification.

We understand this may cause some disruption, and we are committed to supporting you through this transition. Let us work together to minimize the impact.

Thank you for your understanding.

Kind regards

Arnaud Le Lannic
