2 Reason for discontinuation

The affected products are based on software releases that have since been superseded by newer software releases. To guarantee that all products are delivered with up-to-date software, incorporating stability improvements and bug corrections, these modules with older software will soon be discontinued.

3 Customer impact and recommended action

- Customers are advised to migrate to the corresponding successor product
- The successor products have the same hardware, but newer software version
- Successor products are compatible with their predecessor
- Customers are advised to carefully study the appropriate software release notes [1] [2] [3] and to verify the successor product in the end product design.

Modules with older software can be upgraded to newer software
